Week 2: Choosing a Research Group and Advisor
*A discussion of what students should look for in a research advisor and group*

Homework Assignment for week 2:

Create five questions that you would ask when interviewing lab members and advisors when considering particular labs (write each question on separate strips of paper – to be turned in anonymously during the next class period).

Also, on another separate piece of paper write a short paragraph about what you expect in a research advisor (i.e.: your expectations, the type of involvement of the advisor, and/or the type of atmosphere of the lab (group)).
