

Syllabus: Economics 704a · Macroeconomics

Prof. Adam M. Guren · Boston University · Spring 2023

Logistics

TuTh 11-12:15 in CAS 226

Instructor:

Adam Guren

guren@bu.edu

270 Bay State Road, Room 400

Office Hours: Tu 3:30-5, Th 2-3:30 and by appointment in room 400

Please email ahead so I can stagger students. I may move the location of office hours if they are crowded, likely to room 413.

Teaching Assistant:

Michele Marcaletti

mmarcaletti@bu.edu

Section: F 10:10-11:25 in MCS B29

Office Hours: F 11:30-1 in Room B17

Overview:

This is the first half of the second semester first-year Ph.D. course in macroeconomics. The course focuses on Monetary Economics and particularly the New Keynesian Model. The course begins with a review of the Real Business Cycle framework. After considering the evidence for monetary non-neutrality, the course develops the basic building blocks of the New Keynesian framework by adding money, imperfect competition, and nominal rigidity to the RBC model. The course then turns to the conduct of monetary policy. After discussing the liquidity trap and policy in a liquidity trap, we will turn to recent topics in macroeconomics related to the Great Recession and its aftermath.

Textbooks and Course Materials:

- Lecture Notes, Algebra Guides, and Readings will be posted on the course website.
 - Readings outside of textbook and readings listed below each topic will be added and announced via e-mail.
- Textbook:

- Gali, Jordi. *Monetary Policy, Inflation, and the Business Cycle: An Introduction to the New Keynesian Framework and Its Applications*, 2nd Edition. Princeton University Press: Princeton, NJ.
- Other Suggested Macroeconomics Textbooks
 - Sargent, Thomas and Lars Ljungqvist. *Recursive Macroeconomic Theory*, Third Edition. MIT Press: Cambridge, MA.
 - Romer, David. *Advanced Macroeconomics*, 4th Edition, McGraw-Hill.
 - Woodford, Michael. *Interest and Prices: Foundations of a Theory of Monetary Policy*. Princeton University Press: Princeton NJ.

Requirements:

- 13 Lectures From January 19 to March 14
- Exam: 75 minutes in class on March 16
- Problem Sets
 - There will be 5 regular problem sets plus two response assignments that count as one problem set.
 - You are encouraged to work in groups.
 - If you do so you must indicate who you worked with on your write up.
 - Each student must hand in their own write up and submit it to the Blackboard online portal. Your results should be written up as a PDF in L^AT_EX. You do not need to L^AT_EX all your derivations and may append scans of hand-written algebra to the end.
 - Grading: Check+, Check, Check-, 0.
If you make an effort to answer every problem you will get a check, which is considered full credit.
The problem sets will be difficult, and I want to reward tackling the problem rather than getting everything right.
 - There will be six problem sets. Five are standard problem sets. The last “problem set” will consist of two student responses to recent papers on the monetary transmission mechanism. This assignment will be discussed in class.
 - All problem sets will be turned in online through blackboard.
- Grading For This Half of Course: 75% Final, 25% Problem Sets
 - Regrade Policy: If you do not agree with your score, you may ask me for a regrade. I will personally regrade the *entire* test, and you may lose points as well as gain them. Note that I tend to be harsher than the TA.

- You are encouraged to stop me if you are confused and ask questions. I want this to be a discussion rather than a lecture as frequently as possible!
- You may not use electronic devices such as laptops, tablets, or phones in class. If you feel like you need an electronic device to learn or have another good reason to use electronic devices in class, please come see me. I want the course to be fun.
 - I will try to reference interesting recent research.
 - The focus will be on theory, but I will also discuss related empirics.
 - Please ask questions and be engaged. Even if you do not become a macroeconomist, you will be asked about monetary policy for the rest of your life. Now is the time to learn something about it.

Reading List

Required readings are starred. Readings may be changed over the course of the semester.

This reading list is extensive because it is not only be a list of required readings but also a guide to the literature should you become interested in the topics we cover.

- Business Cycle Facts
