KHC EC 103: Housing Policy: An Economic Perspective  
Prof. Adam Guren  
Spring 2024

Professor Adam Guren  
guren@bu.edu  
270 Bay State Road, Room 406  
Office Hours: W 3:30-5, M 9-10:30 (before Spring Break), Tu 11-12:15 (after Spring Break), and by appointment. Please email ahead so I can stagger students.

Course Description:

What makes for effectively designed economic policy, and specifically housing policy? Why is housing so expensive, and what can be done about it? How can the government affordably provide quality housing and improve access to opportunity? How can the government help stabilize the housing market, especially in a housing bust such as the one experienced in the Great Recession?

This course introduces students to economic analysis through the study of housing policy. The first half of the course focuses on microeconomic issues such as housing supply, regulation, rent control, affordable housing, and policies designed to induce households to move to better neighborhoods. The second half of the course focuses on macroeconomic issues related to the large boom and bust in the 2000s that precipitated the Great Recession including, monetary policy, refinancing and mortgage modification, tax policy as it relates to the housing market, foreclosure policy, and macroprudential policies pursued to limit future housing bubbles and busts. This section will include an analysis of the housing finance system in the United States and the challenges involved in redesigning it. Throughout, the course will teach students economic principles and how use data to assess economic arguments.

What This Course is NOT:

A key focus of the course will be on the design of public policy. But this course is NOT about politics. Rather than determining the objectives of policy – which is largely a political question – the economic approach taken by this course focuses on how to design policy to best meet given objectives. For example, rather than discussing how much income should be redistributed in society, we will focus on how to redistribute best and most efficiently given a target amount of redistribution. As such, we will not be focusing on whether we should reduce rents, provide low-income housing support, support homeownership, etc. Instead, we will be focusing on how to best design policies to achieve those ends and understanding why some policies are ineffective at achieving their objectives or even backfire.

I realize it will be hard to put aside your personal politics. But I am going to ask you to so that the course does not evolve into a big political debate every day.

That being said, some of the readings will have clear political angle – it is unavoidable. I have tried my best to balance out the course, so it is as politically neutral as possible.
This course will address the following BU HUB Areas:

1. Social Inquiry II
2. Quantitative Reasoning II
3. Research and Information Literacy

Course Prerequisites:

There are no formal prerequisites, but students should feel very comfortable with algebra and pre-calculus to take this course. We will use simple algebra and the concept of a function and a system of equations quite regularly. Knowledge of differential calculus is useful but not required.

This course is not a substitute for EC101 and EC 102. I will not cover the full curriculum in the introduction to economics sequence. If you want to be an economics concentrator or take more advanced courses that require EC 101 and/or EC 102 as a prerequisite, this course will not replace these two courses.

Course Objectives:

The goal of this course is to provide students with the tools to critically evaluate public policies and their efficacy using theoretical and empirical economic analysis. In particular, students will:

1. Learn the principles of economics. Students will learn the basics of supply and demand, market equilibrium, and the analysis of economic policy interventions, taxes, and price controls, including welfare analysis and externalities.

2. Understand causal inference and research designs used to establish causality in economics. Correlation does not imply causation. Students will learn how economists statistically assess causality, with a focus on several core empirical designs that are repeatedly used in economics – including field experiments, natural or “quasi” experiments, differences-in-differences designs, and regression discontinuity designs – with an eye to critically evaluating these designs and research that uses these designs.

3. Develop the tools to analyze the effectiveness of public policy. Each week, we will focus on a different housing policy and discussing its effectiveness. Over the course of the semester, each student will write a paper that analyzes an existing or proposed housing policy using data.

4. Understand the important questions and concerns in housing policy in the United States. In learning about different housing policies, we will touch on the major issues with which policymakers grapple in formulating housing policy.

5. Evaluate the uses and abuses of quantitative evidence in public discourse. Students will read and analyze descriptions of economic analysis in the popular press and politics and discuss why such evidence is often misunderstood or misused.
6. **Communicate quantitative analysis**, through readings, course discussions, and their final paper.

7. **Understand the research process** including searching for information sources, formulating a topic, gathering and analyzing arguments, and communicating findings.

**Course Format:**

The course will meet twice a week. The first two weeks will provide a course introduction and an introduction to economic analysis and principles. Thereafter, most weeks will be focused on a housing policy (roughly: sometimes a policy will only fill one and a half classes and other times will cut across weeks). Generally, the first class will be a lecture where I will introduce the policy and teach some economics and/or statistical methods that will be used in the analysis of that week’s policy. The second class will be a class discussion of the policy. In preparation for the discussion, you will be expected to read and think about several readings and for selected classes provide a half-page emailed reaction to the readings due the day before. I will provide discussion questions and indicate to you when a response reaction is due. Given the nature of the material, the second half of the semester will be more lecture based.

I want this course to be interactive. If you are confused, tell me! If you want to say something, raise your hand! I also want the discussions to be lively. I ask that every student speak at least once each class.

**Course Materials:**

In the first several weeks, we will be introducing the core economic concepts of supply and demand and how government policy interacts with supply and demand. For this, I will be using several chapters of N. Gregory Mankiw’s *Principles of Economics*. Unfortunately, if you want to purchase this book it is extremely expensive. Given that we will be using only parts of the book for part of the class, I would suggest that you get an e-book rental for the semester for $50, which you can obtain at [https://www.cengage.com/c/principles-of-economics-10e-mankiw/9780357722718/](https://www.cengage.com/c/principles-of-economics-10e-mankiw/9780357722718/). The book is also on reserve at the library.

We will also use three other books which are available at bookstores or Amazon and on reserve at the library:

- *Evicted* by Matthew Desmond
- *High Risers* by Ben Austen
- *The Color of Law* by Richard Rothstein

For background, I have included optional readings from *Housing Policy in the United States, Third Edition* by Alex Schwartz, which is the standard primer on housing policy, and *Fixer Upper* by Jenny Schuetz, a recent book on housing policy in America. Schwartz provides all of the facts about the major housing policies in the U.S. and is an excellent overview, although sometimes it can feel a bit like a laundry-list of policies. I would use it if you want background, and I have indicated what chapter you should read when on the syllabus. Schuetz is more
readable but less comprehensive. These two books and their bibliographies may be useful as you search for a paper topic. Both are available online through the BU library.

Otherwise, the course materials will be a mix of journal articles, summaries of economic research written by me and others, and articles from the popular press available on the course Blackboard website or through the BU Library. The end of the syllabus includes a detailed class-by-class reading list, and I will post reading guides for each class that list the readings and have some questions to think about as you do them. **Please check the latest version of the syllabus online and the reading guide online before you start doing the week’s readings as the required readings will likely change over the course of the semester.**

Many of the readings are URLs. Please let me know ASAP if you are having trouble with them. I go through regularly to check that the URLs work, but there is a chance that a URL has changed since I last checked. Also, sometimes multi-line URLs have a bad link from a PDF. Please try to copy the full URL rather than just clicking on the link, which sometimes does not work.

Some links may be behind paywalls. You should be able to search for the headline and authors in the BU library and access the articles through BU’s subscription services. If you are having trouble accessing any articles, please email me.

A few of the readings may be technical. Do your best to try to understand the key ideas and findings. Read the introduction and do not feel like you need to understand absolutely everything for these technical readings.

**Assignments:**

**Response Papers:** Most weeks (apart from the first two), will focus on a particular housing policy. In general, the first class each week will be a “tools” class on economics related to that week’s policy designed to teach you economic analysis and tools. The second class each week will be a class discussion of the policy based on a reading about the policy. Students will email the professor a ½ page (300-400 word) e-mailed response to the reading the by 3pm the day before the discussion summarizing in their view the successes and failures of the policy in question in light of the readings and discussion questions posted on the course website. The goal here is to make sure you are reading critically, thinking about the material, and ready to discuss the material in class. Classes with a response paper due are indicated with a * on the week-by-week agenda below. There are roughly ten response papers over the course of the semester.

These assignments will be graded as a check plus, check, check minus, or zero:

- **Check Plus (100%):** Reflective of a particularly thoughtful and impressive effort to engage with the readings.
- **Check (90%):** Reflective of strong engagement with the readings.
- **Check Minus (80%):** Reflective of a limited attempt to engage with the readings.
- **Zero (0%):** You did not turn anything in (do not do this).

Your lowest two assignments will be dropped (including any zeros).
**Semester-Long Policy Memo Project:** Over the course of the semester, you will write a policy memo on a housing policy of your choice. This assignment will be broken into stages, with feedback throughout the process.

I want to give you as much leeway as possible in choosing the policy that will be your focus, so the policy can be micro or macro, existing or proposed, U.S. or abroad. I am happy for it to be a broad policy (e.g., “rent control”) but I would like you to have a specific example (e.g., “rent control as implemented by the City of San Francisco”) because the devil is often in the details of how a particular policy is implemented.

The project has six stages:

1. (Weeks 3-4: Jan 29-Feb 9) Meet with the professor for 10 minutes. In advance, email professor one paragraph introducing yourself and your interest in the course and three one sentence ideas for the policy you will analyze for your major assignment. At your meeting, we will try to flesh out the policy that you will analyze this semester.

   For ideas on policies you might be interested look at:
   - Newspapers and magazines! There are lots of articles on housing policy.
   - The papers listed as “Background Reading” below.
   - The Department of Housing and Urban Development publishes an interdisciplinary journal “Cityscape” about housing policy where each issue is centered on a topic. This is a good resource to start your search. See [https://www.huduser.gov/portal/periodicals/cityscape/prev_iss/cspast.html](https://www.huduser.gov/portal/periodicals/cityscape/prev_iss/cspast.html).
   - I would also look at “CityLab” which has a lot of housing policy articles and search google or your favorite newspaper for stories on particular policies.
   - There are nonprofits and think tanks in most areas thinking about these issues and issuing proposed policies or analyses of policies which could be a good jumping off point for you.

   I typically see a few pitfalls:
   - Students are often not specific enough. Give me specific policies, not broad topics and areas.
   - Students pick something that does not have shades of grey. The best paper topics tend to be things that are not obviously great or horrible, because there is not that much to critique or analyze or any room for improvement. An example of this is redlining, which is base racism. There is not much to analyze or think about how to improve it – it is just bad.
   - Students sometimes come to me with a critique in mind. I would much rather you pick a policy, research it, and then decide what to say than come with a particular angle in mind.

2. (Week 6: February 20) 2-page description of your policy. What are its objectives? What are the design features? What is the history of the policy, and when was it implemented and/or changed (or when will it be implemented)?
The goal here is to familiarize yourself with the policy and its details and start researching the nuts and bolts of this policy.

3. (Week 8: March 7) 3-page literature review with citations. What has been written about your policy? What aspects of the policy are controversial? What are costs and benefits of the policy? What critiques have been made?

   The goal is to familiarize yourself with the types of arguments being made about your policy and what has been said about it in preparation for you making a policy recommendation. This will require finding primary and secondary sources about your policy.

4. (Week 9: March 7) Each student will present their paper topic and background on literature to the class for 5 minutes. You do not need to use slides, but if you do you may not use more than 4 slides.

   The goal is for us all to learn about what members of our class are working on for their final policy memos and to help everyone with their memo by brainstorming things they might think about and explore in their memo as a group. It is my hope that this will help point you in the right direction for the final memo.

5. (Week 11: April 2) 1 page description of the data component of your final paper.

   Your final paper must include an analysis of data. This is left deliberately open ended. Most students will provide an analysis of an existing empirical study or data analysis by researchers or a local government. You may also conduct your own new analysis of data.

   In your data analysis, you should assess how convincing the data you have brought to bear is. What is the research design for causality and is it credible? What are the assumptions needed to evaluate the causal effects of the policy? Based on what you have learned this semester, what is good and what is not? Do you believe their results? I want you to not only presents data or an existing data analysis but analyze the data or the analysis.

   An important part of data analysis is communication and visualization of the data, so you should pay attention to how the data is communicated and presented to the reader, which we will discuss throughout the semester. Please do not drop in a very large data table because that is what another paper did. Instead think about what your reader needs to see and how to clearly convey this in a table and figure that selects and highlights what you think is important. I also want you to put thought into how you explain the data to the reader. Do not just say “Table 1 says housing is expensive.” Instead, go through the axes or what is on each line, explaining and interpreting the table or figure for the reader and drawing their eye to key features.

   At this point, you should have a sense if (1) what your data analysis will be and (2) if
you are getting your own data, you should have it. You should discuss your data analysis with the professor, who can help you find what data to include.

The goal is to make sure you do not leave the data analysis component until the last minute.

6. (Week 15: April 30) 10-15 page Policy Memo meant for the policy maker in charge of implementing your policy. Your memo should address whether the policy is the policy successful at meeting its objectives and how it might be improved. You should have a clear policy recommendation as part of your analysis.

The memo should include:
- 1 page introduction and summary of your main argument.
- 3-4 page description of the policy, its objectives, and what has been written about the policy. This should make use of your 2-page description of the policy and 3-page literature review, but you must edit these down. The idea is to present only those things that are important for your subsequent analysis.
- 6-10 page analysis of the effectiveness of the policy, including the data analysis. This is the meat of the memo.
- Brief conclusion.

Do not feel like you need to go to the longer side. Brevity is encouraged! I do, however, want to give you enough room to make any presentation of data large enough (please, no tiny or giant tables or figures).

I realize this is an open-ended assignment. To give you guidance I have posted several sample memos that were highly successful from past years when I taught the course on the course website. I am also happy to meet with you one-on-one to provide help and guidance, and we will discuss the memo quite a bit in class.

Grading:

40% Class Participation and Response Papers
60% Final Project divided as follows:
- 5% Preparation for initial meeting with professor.
- 10% 2 Page Policy Description
- 10% 3 Page Literature Analysis
- 10% 5 Minute Presentation
- 5% 1 Page Description of Data Analysis
- 60% Final Policy Memo

I will give grades and progress updates at each stage of the final project.

Course Policies:

**Laptops and Cell Phones**: I ask that students not use cellular phones, social media, or similar devices in class. I also ask that students not use laptops or tablets for reasons other than Zoom.
This article explains why: [https://www.nytimes.com/2017/11/22/business/laptops-not-during-lecture-or-meeting.html](https://www.nytimes.com/2017/11/22/business/laptops-not-during-lecture-or-meeting.html). If you need to use a laptop or tablet for educational/learning reasons, please come talk to me about it and I can exempt you from this policy.

**COVID-19 and Unforeseen Bumps in the Road:** I know that it can be difficult to making decisions that may impact your health (and that of your loved ones) as well as your educational future. I empathize with these challenges and will work to support you to the best of my ability. Please reach out at any time if I can be of help. I care about your health, mental health, and well-being just as I care about your learning in our course.

If you do test positive for COVID or find yourself required to quarantine, I encourage you to be in touch with me, just as I would ask you to let us know of any illness or life circumstance that would impact your performance in my course. With this information, I will be better able to support you and make course accommodations as needed. I will certainly keep any personal information in confidence. I can also share course videos from prior years for most (but not all) classes if you have to miss class. I may not be able to record course sessions but can try my best to give you Zoom access or share course videos from last year.

I also know that unforeseen circumstances may arise that may limit your ability to engage with the course. I will be as lenient as reasonably possible so long as things do not seem to be turning into a worrisome pattern.

Finally, I may have to miss class. If this happens, I will adjust and reschedule class or move class to Zoom as appropriate.

**Attendance and Participation:** You are required to attend all classes unless you have a reason that you communicate to me prior to class. If you miss more than one meeting, your course grade may be lowered by 1/3 of a letter grade per missed class. If you have a special obligation that will require you to miss several classes, please discuss with me at the beginning of a semester.

Participation in class is important, especially for the second class each week in which we discuss the week’s housing policy. I expect every student to make a comment in every class discussion. Participation will count towards your grade.

**Assignment Completion and Late Work:** Weekly response papers that are more than an hour late will be docked one grade. Weekly response papers that are not turned in prior to class will be given a zero. Each stage of the semester-long project will be docked 1/3 of a letter grade for each day late. If you will not make a deadline or require an extension, please let me know in advance.

**Plagiarism:** Plagiarism will be taken very seriously and is not allowed. Plagiarism refers to both directly lifting language or paraphrasing an idea without attribution. I am not expecting you to have an entirely new idea in your memo; it is meant to synthesize a coherent policy argument. Given this, there is no reason for you not to liberally cite sources that you use. Doing so repeatedly and using quotations from sources that you attribute to them is perfectly fine, and I will not mark you down for doing so. The issue arises when you do not appropriately cite sources.
To that end, you must turn in your final memo through Turnitin. This online tool will check your paper for similarity to millions of sources and help me identify potential plagiarism. This can be done under the “policy memo” tab on the course website. You can submit, view your similarity report, and resubmit if you are concerned about the similarity report.

Use of Artificial Intelligence (Based on Kilachand Studio Course Policy): Generative Artificial Intelligence and Natural Language Models, like ChatGPT, will change the ways we write and research. AI has already shown promising application across a variety of fields, and it will likely play an increasing role in our everyday lives. However, the goal of your Kilachand Seminar is to develop your ability to think critically, analyze policy, and produce compelling written work on your own. The use of AI writing might produce a satisfactory essay, but such use prevents you from engaging in the difficult intellectual work of thinking through your ideas and finding the best way to communicate them and it prevents you from learning how to analyze a policy or produce a compelling argument. In other words, it prevents you from learning. Moreover, AI obscures the provenance of its information; given that this course fulfills the HUB obligations for research and information literacy—a crucial component of which is understanding the different pathways for finding information, verifying its credibility, and using information to create new knowledge—such a characteristic is antithetical to the kind of fact-checking and scholarly research skills Studio classes emphasize. Consequently, unless you are given explicit permission by your instructor, you should not use AI to produce or revise any of your writing for this class, in part or in whole. If given permission, all use of AI should be appropriately cited. If you have any questions, please reach out to me. Unauthorized use of AI is in violation of the Kilachand Honor Code.

I am, however, willing for you to use generative AI in two cases. First, to help you find a policy memo topic, you may want to use tools like Chat GPT to explore and learn about housing policies much like you would use a search engine (although Chat GPT’s knowledge ends in 2022). Second, generative AI can be useful for producing code to analyze data, especially when you are unfamiliar with a programming language. If you are doing your own data analysis, you may use Chat GPT to assist you in coding. All other uses of AI is not allowed. Note that AI frequently makes mistakes or has hallucinations so it will be noticeable.

Academic Conduct: No collaboration with other students is allowed on the weekly response papers or the semester-long project

Students must act in accordance with BU’s Academic Conduct Code which is available at https://www.bu.edu/academics/policies/academic-conduct-code/.

Students must also adhere to Kilachand’s Conduct Code: “All Kilachand Honors College students are expected to maintain high standards of academic honesty and integrity. Every Kilachand student must follow Boston University’s Undergraduate Academic Conduct Code regarding “academic misconduct,” which is “conduct by which a student misrepresents his or her academic accomplishments, or impedes other students’ opportunities of being judged fairly for their academic work. Knowingly allowing others to represent your work as their own is as serious an offense as submitting another’s work as your own.” Furthermore, Kilachand
students must meet all Kilachand Honors College Academic Standards. These policies and procedures should guide students in achieving their educational goals.”

Accommodations, Resources and Support:

Students needing academic accommodations are encouraged to contact the Office for Disability Services (353-3658). If you require special accommodations, please notify me within the first two weeks of class so that I can make arrangements in a timely manner.

Office of Disability Services
19 Deerfield Street, 2nd Floor
(617) 353-3658 http://www.bu.edu/disability/

Educational Resource Center
One-on-one peer tutoring, study skills help, and writing assistance.
100 Bay State Road, 5th Floor
(617) 353-7077 www.bu.edu/erc

Writing Center
100 Bay State Road, 3rd Floor
(617) 358-1500 http://www.bu.edu/writingprogram/the-writing-center/

Library Resources:

The BU Library is a tremendous resource. The librarians are happy to help you find materials for the class and for your term paper. The library has a powerful search function at the front page www.bu.edu/library. You can find books, e-books, journal articles, and periodicals through this powerful tool. For instance, if you search for “Schwartz housing policy” the top result will be two versions of the Schwartz book. You can click on the third edition and find a link to the online e-book. The library also has a guide to economics research that contains several different resources specifically related to economics, which you can find at http://library.bu.edu/economics.

Feedback:

I care a lot about this course’s success and want to make sure the course is interesting, rewarding, and that you understand the material. I also want to make sure that the readings are not overwhelming.

Consequently, I want to encourage you to give feedback to me about the course. If you do not fully understand something or something or something is not interesting, tell me. If a reading was too difficult or too long, let me know. You will never be penalized for giving me constructive feedback, and I will use your suggestions to improve the course as the semester proceeds. Please be candid. It can only help you by making the rest of the course better!
Office Hours:

This class is likely the smallest and most interactive class you will take this semester. Take advantage of the small group and come to office hours. I’m happy to discuss the class, work with you on your paper, and generally advise you about your first year. My office hours are Tuesday 3:30-5, Monday 9-10:30 (before 3/17), and Thursday 9-10:30 (after 3/17) and by appointment. Please let me know if you via email if you are going to come so I can be sure to accommodate you and know whether I need to move office hours to a more spacious venue; my office hours may be busy for the first half of the semester when I am teaching two PhD courses in addition to this course. If these times do not work for you, email me and we will find a time that works. I may have to cancel and reschedule a few office hours over the course of the semester or move some office hours to Zoom and will email you if this happens. This is even more reason not to show up at my office without emailing ahead.
Day-By-Day Agenda
(Subject to Change)

Part 1: Introduction
January 18 (1): Intro: Why Care About Housing Policy? What is the Economic Approach?
January 23 (2): Why is Housing So Expensive? Supply, Demand, Zoning, and Regulation I
January 25 (3): Why is Housing So Expensive? Supply, Demand, Zoning, and Regulation II

Student Meetings With Instructor This Week to Discuss Topics for Policy Memo
January 30 (4): Matthew Desmond’s Evicted * (Significant reading)
February 1 (5): The Impact of Neighborhoods

Part 2: Affordable Housing Policy
February 6 (6): How to Make Housing Affordable? Public Housing, Rent Subsidies, Building Subsidies, and Price Controls
February 8 (7): Public Housing and Hope VI * (Significant reading)
February 13 (8): Moving to Opportunity and Causality
February 15 (9): Moving to Opportunity II, Improving Vouchers
February 20 (10): Subsidies for Rental Housing and the Low-Income Housing Tax Credit I *
(Policy Description Due)
February 22 (11): Subsidies for Rental Housing and the Low-Income Housing Tax Credit II
February 27 (12): Rent Control I
February 29 (13): Rent Control II, Inclusionary Zoning
March 5 (14): Affordable Housing Wrap Up *
March 7 (15): Student Presentations
(Memo Lit Review Due, Student Presentations on Final Memo Topics)

Part 3: Homeownership, Discrimination, and Policy in Practice
March 19 (16): The Housing Finance System I
March 21 (17): Taxes and Housing: The Home Mortgage Interest Deduction *
March 26 (18): Discrimination in the Housing and Mortgage Markets I * (Significant Reading)
March 28 (19): Housing Policy in Practice (Guest Speaker: Sheila Dillon, City of Boston) *
April 2 (20): Discrimination in the Housing and Mortgage Markets II
(Policy Memo Data Component Description Due)

Part 4: The Recent Boom and Bust and Policies to Ameliorate Housing Cycles
April 4: No Class (“The Big Short” Movie Night Scheduled Around Here Instead of Class)
April 9 (21): Housing Finance System II / Understanding Boom and Bust I (Watch Big Short)
April 11 (22): Understanding the Boom and Bust II
April 16 (23): Understanding the Boom and Bust III
April 18 (24): Foreclosure Mitigation Policy I *
April 23 (25): Foreclosure Mitigation Policy II, Regulation, and GSE Reform
April 25 (26): COVID-19 and Housing Policy *
April 30 (27): Monetary Policy and the Mortgage Market, Conclusion
(Final Policy Memo Due Via Email and Turnitin)

* Denotes class with response paper due.
Detailed Course Outline and Readings

Note: This reading list will be updated and changed as we go through the semester. Please check the newest version and when in doubt trust the reading guide for each class over the syllabus.

Optional background reading:

Part 1: Introduction

January 18 (1): Intro: Why Care About Housing Policy? What is the Economic Approach?

Key Concepts:
- Principles of Economics

Readings:
- Mankiw, Principles of Economics, Ch. 1-2.

Optional Readings:
- Schwartz, Housing Policy in the United States, Ch. 1.

January 23 (2): Why is housing so expensive? Supply, Demand, Zoning, and Regulation I

Key Concepts:
- Supply and Demand
- Market Equilibrium
- Elasticity

Readings:
- Mankiw, Principles of Economics, Ch. 4 and Ch. 5 introduction, 5-1abd, 5-2, 5-3b

Optional Readings:
- Mankiw, rest of Ch. 5

January 25 (3): Why is Housing So Expensive? Supply, Demand, Zoning, and Regulation II

Key Concepts:
- Housing Supply
- Zoning and Regulation

Readings:

Fun:

Optional Readings:
• Schwartz, Housing Policy in the United States, Ch. 2.
• Schuetz, Fixer Upper, Ch. 2, Ch. 7.

• Boston-Focused:

January 30 (4): Matthew Desmond’s Evicted

Key Concepts:
• Eviction
• The Sociological Approach
Readings:

*Note: The readings for this class are unusually long.*

- Desmond, Mathew (2016). *Evicted: Poverty and Profit in the American City*.  
  - Entire book through epilogue.

Optional Readings:

February 1 (5): The Impact of Neighborhoods

Key Concepts:
- Externalities
- The Importance of Neighborhoods and Neighborhoods Effects

Readings:

*Note: Do not read the Chetty et al. papers just the NYT articles and summaries.*

Browse the atlas at: [https://www.opportunityatlas.org/](https://www.opportunityatlas.org/).

Optional Readings:

- Mankiw, Principles of Economics, 10-3 and 10-4.

Part 2: Affordable Housing Policy

February 6 (6): How to Make Housing Affordable?

Public Housing, Rent Subsidies, Building Subsidies, and Price Controls

Key Concepts:

- Kinds of Government Intervention

Readings:

*Note: The readings are light for this class because the next class has a lot of reading.*

February 8 (7): Public Housing and Hope VI

Key Concepts:

- Public Housing
- Hope VI

Readings:

*Note: The readings for this class are unusually long.*

  - Entire book.

Optional Readings:
• Schwartz, Housing Policy in the United States, Ch. 6.

February 13 (8): Housing Vouchers, Moving to Opportunity, and Causality

Key Concepts:
• Correlation vs. Causation
• Randomized Controlled Trials and Field Experiments vs. Natural Experiments
• Lessons from MTO
• Outcomes from giving households vouchers.

Readings:
Note: The readings are light for this class because the next class has a lot of reading.

Optional Readings:
• Schuetz, Fixer Upper, Ch. 4.

February 15 (9): Improving Housing Vouchers

Key Concepts:
• Differences-in-Differences Design

Readings:

February 20 (10): Subsidies for Rental Housing and the Low-Income Housing Tax Credit I

Key Concepts:
• Subsidies in Supply and Demand Model (revisited)
• Tax Expenditures
• LIHTC
